For 30 years, the physicians at Professional Orthopaedic Associates have delivered unsurpassed orthopedic care with the highest level of dedication and expertise. From initial evaluation through the last visit, patients can trust in the way these doctors diagnose and treat orthopedic conditions—with compassion, excellence and an emphasis on listening to their patients' needs and concerns.

Drs. Bade, Johnson, Torpey, Foos, Gentile, Cohen, Gabisan and Gesell are all board-certified orthopedic surgeons with subspecialty training from some of the most prestigious medical institutions in the country, including the Hospital for Special Surgery in New York City. Dr. Swick, a specialist in nonsurgical spine care, has board certifications in anesthesiology and physical therapy.

This award-winning team offers cutting-edge techniques, such as minimally invasive arthroscopic surgery for the shoulder, hip, knee, elbow, wrist and ankle; advanced treatment of sports-related injuries; advanced spinal procedures, including anterior cervical and lumbrosacral discectomy with fusion; STAR™ ankle replacement; and MAKOpasty® robotic-assisted surgery for hip and knee replacements. The doctors also offer a range of nonoperative solutions and serve as orthopedic team physicians for Monmouth University, Georgian Court University and more than 20 area high schools.

"We pride ourselves on providing care to the whole family—from competitive high school athletes to their active grandparents and everyone in between," says senior partner Dr. Torpey.
